

IP65

Application

This unit is for use at all kinds of night work site and rescue and relief work spot.

Characteristics

- The cart adopts the aluminum frame, light weight and easy for transportation.
- It uses digital inverter petrol generator set, with stable performance, quiet and light weight.
- Equipped with ceramic metal halide light source with long service life and high efficacy.
- The mast extension height is 1.45-2.8meters. The mast is foldable.
- Easy to transportation on bumpy road
- LED lamp is available according to customers' requirements.

Main specification

Specification	Unit	ZW3520B
Generator rated output voltage	VAC	220
Generator max output power	KVA	1.05
Generator rated output power	VA	900
Generator DC output		12V / 8.3A
Rated Power	W	2*150
Light output	lm	2*11,500
Operation time after full fueled	h	>6
Mast extension height	mm	1,450-2,800
Beam range (1lx)	m	90
Weight	Kg	42
